Sequence 20, Application US/09498851

Patent No. 6440671

GENERAL INFORMATION:

APPLICANT: Mizzabekov, Andrei D

APPLICANT: Patinov, Sergei V

APPLICANT: Rivillov, Eugene V

APPLICANT: Dubiley, Svetlana A

TITLE OF INVENTION: Use of Continuous/Contiguous

TITLE OF INVENTION: Stacking Hybridization as a Diagnostic Tool.

NUMBER OF SEQUENCES: 88

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                Sequence 174, Application US/08469318
Patent No. 6022535
GENERAL INFORMATION:
APPLICANT:
TITLE OF INVENTION: Multivariant IL-3 Hematopoiesis Fusion
TITLE OF INVENTION: Protein
NUMBER OF SEQUENCES: 196
COMPUTER READABLE FORM:
MEDIUM TYPE: Floppy disk
APPLICANT: Pardee Ph.D., Arthur B.
TAPLICANT: Liang Ph.D., Peng
TITLE OF INVENTION: SYSTEM FOR COMPARING LEVELS OR AMOUNTS
TITLE OF INVENTION: OF MRNAS
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             Length 10;
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   0; Indels

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    ö
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         Sequence 1, Application US/09724753
; Patent No. 6416953
GENERAL INFORMATION:
APPLICANT: Michael J. Heller
ITLE OF INVENTION: SELF-ORGANIZING MOLECULAR PHOTONIC
TITLE OF INVENTION: SELF-ORGANIZING MOLECULAR PHOTONIC
AND FLUCROPHORE-CONTAINING
POLYNUCLEOTIDES AND METHODS OF
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         Length 10;
                APPLICANT: Caparon, Maire H.
APPLICANT: Easton, Alan M.
APPLICANT: Klein, Barbara K.
APPLICANT: Klein, Barbara K.
APPLICANT: Olins, Peter O.
APPLICANT: Paik, Kuman
APPLICANT: Paik, Kuman
APPLICANT: Tromas, John W.
TITLE OF INVENTION: Multivariant IL-3 Hematopoiesis
TITLE OF INVENTION: Pusion Protein
NUMBER OF SEQUENCES: 197

Sequence 371, Application US/08758306

Patent No. 5807743

GENERAL INFORMATION:
APPLICANT: Stinchcomb, Dan T.
APPLICANT: McSwiggen, James A.
ITILE OF INVENTION: METHOD AND REAGENT FOR THE
TITLE OF INVENTION: TREATMENT OF DISEASES
TITLE OF INVENTION: INTERLEUKIN-2 RECEPTOR
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         0; Mismatches

Patent No. 6537751

GENERAL INFORMATION:
APPLICANT: Chone, Daniel
APPLICANT: Chumakov, 11ya
TITLE OF INVENTION: Biallelic markers for use in constructing a high density...
FILE REPERBNCE: GENSET.020CP1
CURRENT FILING DATE: 1999-10-20
CURRENT FILING DATE: 1999-04-21
EARLIER APPLICATION NUMBER: US 60/109,732
EARLIER PILING DATE: 1999-11-23
EARLIER PILING DATE: 1999-11-23
EARLIER PILING DATE: 1999-11-23
EARLIER PILING DATE: 1999-11-23
EARLIER PILING DATE: 1998-11-23
